Education

Master of Science in Engineering Data Science & AI, University of Houston, Houston,TX. Aug 2025- Present
Coursework: Software Engineering, Predictive Data Analytics, Intro to Machine Learning, Big Data Analytics, Database Management tools, Applied Neural Networks, Data Visualization, Data Structures and Algorithm, Intro to Data Science, Statistical Modeling.

Bachelors in Computer Science, Iqra University, Pakistan, GPA: 3.71/4.0, Gold Medalist. Jan 2021 - Jan 2025

Skills

Languages,Tools & Frameworks: Python, SQL (Hive, Teradata, Oracle), JavaScript, PHPMyAdmin, C#, .NET, Java, Jupyter, Google Colab, Visual Studio Code, Visual Studio, Microsoft SQL Server, PHPMyAdmin, Firebase, Github, AWS(S3), JavaFx, Node.js, Typescript.

ML/AI & Analytics: Tableau, Power BI, SSRS, DBeaver, Excel, Neural Networks, Random Forest, SVM, TensorFlow/Keras, Pandas, OpenAI API, GIT, OAS.

Web & App Development: React.js, React Native (Expo Go), Next.js Vue.js, Express.js, MongoDB, Prisma, Redux Toolkit/Thunk, Material UI, Bootstrap, Typ

Marketing & Design: Meta Suite, Canva, Hootsuite, Adobe Creative Suite, Hootsuite, Publer.

Work Experience

Graduate Research Assistant Feb 2026 - Present
The Biomedical Imagine Lab, University of Houston
Houston, Texas.

- Working under Prof. Labate Demetrio on identifying neuronal soma location and morphology from fluorescence microscopy images.
- Building image-processing and analysis workflows using ImageJ/Fiji to study and measure neuronal structures across 1,000+ images.
- Assisting with data preparation, feature extraction, and result validation to support healthcare-focused machine learning research.

Marketing Analyst Aug 2025 - Present
A.D Bruce Religion Center,University of Houston.
Houston, Texas.

- Marketing 3+ weekly programs (Free Wednesday Lunches, Good Morning Mondays, LEGO stress events) to increase student turnout.
- Creating and scheduling 10–15 social posts/week to promote events and boost engagement.
- Planning content strategy that improved average event reach by 25–30%.
- Hosting and managing 5+ on-campus activations/month to promote wellness and stress-relief initiatives.

Associate Business Intelligence Apr 2025 - Aug 2025
BluTech Consulting.
Karachi, Pakistan.

- Consulted for UBL to streamline reporting and enable data-driven decisions through dashboards and analysis.
- Built 10+ interactive Power BI and Tableau dashboards supporting strategic initiatives.
- Used SQL, Teradata SQL, and HiveQL to clean and transform 500K+ records.
- Reduced reporting turnaround time by 25% by identifying performance trends and bottlenecks.
- Translated complex data into actionable insights for non-technical stakeholders.

MERN Stack Developer Aug 2023 - Apr 2025
SoftSyncDev.
Karachi, Pakistan.

- Developed a React Native app from scratch with Expo Go and TypeScript, Node.js backend, and AWS S3 integration for real-time video streaming, along with AI chat bot.
- Worked extensively with Node.js to create RESTful APIs.
- Optimized APIs and databases, achieving 40% faster data retrieval and scalable performance.
- Developed and deployed over 5 full-stack projects using MERN technologies, focusing on seamless functionality and user experience.

Undergraduate Teaching Assistant Aug 2023 - May 2024
Iqra University
Karachi, Pakistan.

- Evaluated 100+ student assignments and projects, providing constructive feedback to improve class performance. (DBMS: CSC331)
- Assisted 40+ students in identifying and resolving Java coding errors, improving debugging skills and promoting independent problem-solving through assignments. (OOP: CSC231)
- Mentored students one-on-one, improving pass rates and overall class performance by 15%.

Performance Analyst Aug 2022 - Aug 2025
The Walnut Agency.
Karachi, Pakistan.

- Managed 70+ client accounts across industries, increasing engagement by 60%+ through organic growth strategies.
- Analyzed performance metrics and optimized campaigns, boosting conversions by 25%.
- Coordinated content creation and influencer partnerships, leading to 30% higher reach.
- Provided consulting and regular project updates, ensuring 100% on-time campaign delivery.

Projects

HMS-Harmful Brain Activity Classification | *Pandas, Python, CNN, Keras, EfficientNetB2, Scikit-learn, NumPy, Seaborn*

Iqra University
Developed CNN and EfficientNetB2 models to classify harmful brain activity(seizure vs non-seizure)from EEG spectrograms using a Kaggle dataset of 54,000 images, evaluating probabilistic predictions with Kullback–Leibler divergence.

Handwritten Digit Recognition | *Pandas, Python,Tensorflow, Scikit-learn, NumPy, Matplotlib, Seaborn*

Iqra University
Developed a Handwritten Digit Recognition model as part of my Deep Learning course project, which achieved a 98.7% accuracy on the MNIST dataset and 95% on unseen images.

Titanic Survival Prediction Using Naïve Bayes| *Pandas, Python,Tensorflow, Naïve Bayes, Scikit-learn, NumPy, Matplotlib, Seaborn*

University of Houston

- Passenger survival prediction using demographic and travel features.
- Naïve Bayes classification for probability-based outcome estimation.

Analyzing Global University Rankings (2020–2025)| *Pandas, Python, Scikit-learn, NumPy, Matplotlib, Selenium, Seaborn*

University of Houston

- CWUR ranking data collection and analysis (2020–2025)
- Comparison of university and country performance over time.
- Analysis of key ranking factors.

Busy Bodies| *React Native, Expo Go, Node.Js, Typescript, AWS (S3)*

SoftSyncDev

Built and deployed a fitness app on iOS using React Native (Expo Go) with a Node.js backend, enabling users to create custom workout routines. Integrated AWS S3 to manage large video files and stream them in real time, ensuring smooth performance and reliable data handling.
